

Custom AI systems and program management for government contractors. Opportunity discovery, proposal and grant drafting, cost volumes, and program control, built and run by a retired Air Force Senior NCO and PMP. One builder, twenty years on the government side of the table.

Core competencies

- Custom AI systems on Anthropic and OpenAI models: multi-agent pipelines for proposals, grants, and cost volumes, grounded in the client's documents and rates, validated before delivery.
- Opportunity intelligence across 29 federal and state sources (SAM.gov, SBIR/STTR, Grants.gov, DARPA), scored against the client's capabilities.
- Program and project management: PMBOK, Agile, and hybrid delivery; stage-gated new product introduction; risk, cost, and performance integration.
- Software and workflow: Python, Flask, React, Next.js; Microsoft PowerApps and Power Automate; ERP and financial data automation; dashboards.
- Defense innovation support: SBIR/STTR and OTA programs, PIA and CRADA execution, market research, technology transition planning.

Differentiators

- Twenty years inside the customer, from aircraft maintenance to flight chief over one \$610M aircraft maintenance contract.
- Grounded AI. Cost volumes price against the labor rates the client supplies; the system will not invent rates or past performance.
- One person, accountable. The person you talk to is the person who builds and delivers.
- Working platform, not slideware: eight tools live at kibeyinnovations.com.

Past performance

- Bomber Supply Chain Initiative, AFRL through the Wright Brothers Institute: led a supply chain resilience initiative for the Air Force bomber fleet.
- F-35 Manpower Model, AFRL through WBI: led the effort to design a manpower model for the F-35 Joint Program Office.
- Acquisitions, Management and Integration Center, Nellis AFB (2021 to 2024): flight chief over one \$610M contract: 12 Contracting Officer Representatives, 167 aircraft.

Company data

Legal name	Kibey Innovations LLC
UEI	Y965YTPMRXF4
CAGE	16QT2
SAM.gov	Active registration
Ownership	Veteran-owned small business
Location	458 McCray Blvd, Springboro, OH 45066
Principal	Joshua Kibe, PMP, USAF (Ret.)
Email	joshua.kibe@kibeyinnovations.com
Phone	570-239-2273
Web	kibeyinnovations.com

Certifications

- Project Management Professional (PMP), PMI
- AS13004
- AS9110 Rev C, aerospace maintenance quality management
- AS13000 8D problem solving
- Government Ground/Flight Representative, Defense Acquisition University

Platform tools

- Opportunity pipeline, CRM and pipeline, proposal generator, grant writer
- Cost estimation with validation pass, project management, financial management
- Org chart parser, knowledge base with cited answers, supplier scout

Education

- Master of Project Management, Penn State University, completed August 2026; MBA in progress at Penn State
- Bachelor of Applied Science, Project Management, Embry-Riddle Aeronautical University, magna cum laude
